Description

CCIS EXPERTISE is an international audit and advisory company, its activity is organized around three main areas of expertise: 1. EAC Certification and homologation procedures for equipment; 2. accompanying industrial implantation regarding regulatory risk management (in particular, for EPC contracts); 3. regulatory monitoring and training regarding regulation requirements. Our company has been contributing for years to voluntary regulation process in these countries, ongoing research to take into account the interests of all market players concerned to act in accordance with local rules. In this perspective, values such as fairness, relevant research and innovation are core values for CCIS EXPERTISE. Acting within the network of international experts (professionals involved in standardization, auditors, and trainers), partners (state departments of the Russian Federation, Kazakhstan, Ukraine and Belarus), accredited laboratories and professional organizations - the company CCIS EXPERTISE operates to bring together the players and the skills to bring out and develop solutions. CCIS EXPERTISE supports companies in the products design and implementation and the regulatory monitoring projects deployment in the CIS countries and EurAsEC in many sectors of business and industrial activity. CCIS EXPERTISE offers a wide range of engineering services covering virtually the full range of various aspects of your project, from the phases of planning and design related to the implementation, through trials and tests required as well as the steps involved in manufacturing, and local administrative procedures for approval.
